Career Summary

Cybersecurity-focused Computer Science undergraduate specializing in **Cybersecurity and Digital Forensics**. Strong hands-on experience in penetration testing, VAPT, network security analysis, and machine-learning-based security systems. Proficient in applying frameworks like NIST and ISO to modern cyber defense and committed to mastering offensive security and SOC operations.

Education

B.Tech – Computer Science & Engineering (Cybersecurity & Digital Forensics) 2023 – 2027

Current CGPA: **7.94**

Class XII (CBSE) – Kailasanadha Vidyanikethan 2022

Percentage: **67%**

Class X (CBSE) – Sreeramakrishna Vidyanikethan 2020

Percentage: **84.4%**

Technical Skills

- **Cybersecurity:** Ethical Hacking, VAPT (Vulnerability Assessment & Penetration Testing), Web Security, Cyberthreat Analysis, Reconnaissance
- **Frameworks & Privacy:** NIST Cybersecurity Framework, ISO/IEC 27001, Data Privacy Techniques, Steganography
- **Security Tools:** Nmap, Metasploit, Burp Suite, Wireshark, Hashcat, SQLmap
- **Programming & ML:** Python, Java, Applied ML for Intrusion Detection
- **Operating Systems:** Linux (Kali, Parrot), Windows

Projects

Intrusion Detection System Using Machine Learning

- Developed an ML-based IDS using the **KDD dataset** to classify malicious network traffic.
- Implemented classification models to distinguish between normal activity and various attack vectors.
- Focused on feature selection and preprocessing to improve detection accuracy.

Image Steganography Using Machine Learning

- Designed a system for secure hidden communication by concealing data within 512 x 512 images.
- Utilized intelligent embedding techniques to ensure high payload capacity with minimal visual distortion.
- Evaluated resistance against common steganalysis attacks to ensure data privacy.

Certifications

- Google IT Support Professional Certificate

Areas of Interest

- Penetration Testing & Vulnerability Research
- Security Operations Center (SOC) Operations
- AI/ML in Cyber Defense
- Web Application Security
