Education

VIT Bhopal University, Bhopal, India

2023 – 2027

Bachelor of Technology in Computer Science and Engineering (Cybersecurity)

Technical Skills

- **Programming Languages:** Python, SQL
- **Web Technologies:** HTML5, CSS3
- **Security & VAPT:** Web Application Security (OWASP Top 10), Network Security, Vulnerability Assessment and Penetration Testing (VAPT), Reconnaissance
- **Security Tools:** Nmap, Wireshark, Metasploit, Hashcat, Burp Suite, Kali Linux
- **Frameworks & Standards:** NIST Cybersecurity Framework (NIST CSF), ISO/IEC 27001, OWASP Top 10
- **Tools & Platforms:** Git, GitHub, Linux, Windows

Projects

SentinelIDS – Network Intrusion Detection System

github.com/devkrishnaus/SentinelIDS

Python, Scapy, Flask, SQLite, WebSockets

- Built a real-time network monitoring tool using Python and Scapy to inspect packets across local network interfaces.
- Designed detection rules to identify common network attacks, including SYN flood attempts, port scans, and malicious web queries.
- Developed an interactive Flask web dashboard with live WebSocket streaming for real-time traffic alerts and threat logs.
- Implemented persistent alert storage in SQLite for historical tracking and configured automated email alerts for critical security events.

StegaShield – Image Steganography and File Encryption

github.com/devkrishnaus/StegaShield

Python, FastAPI, React, AES-256, Cryptography

- Developed a secure web application that embeds confidential text messages inside PNG and BMP image files using LSB steganography.
- Applied AES-256 encryption and secure password hashing prior to embedding data to protect information against analysis.
- Built a React-based user interface for uploading images, entering confidential notes, and downloading protected image files.
- Engineered a FastAPI backend to process uploads, verify image quality, and securely extract hidden messages given the correct password.

AI Business Analyst – Data Analysis Tool

github.com/devkrishnaus/ai-business-analyst

Python, FastAPI, React, TypeScript, Gemini API, Scikit-Learn, Plotly

- Developed an interactive web platform enabling users to upload CSV spreadsheets and query data using natural language.
- Integrated the Google Gemini API to translate natural language questions into database queries and generate written data summaries.
- Applied Scikit-Learn algorithms to detect anomalies, trends, and statistical outliers across uploaded datasets.
- Built dynamic, interactive dashboards using Plotly to visualize performance metrics and key findings.

Certifications

- AWS Certified Solutions Architect – Associate
- Google IT Support Professional Certificate
- ServiceNow System Administration Fundamentals – On-Demand Course
